1 Agriculture

| | |
|---|--------|
| 1.1 Agricultural system | 1 - 4 |
| 1.2 Types of agricultural systems | 1 - 7 |
| 1.3 Subsistence farming in the Sahel – Nomadic herding | 1 - 8 |
| 1.4 Commercial farming in Southern California – Irrigation farming | 1 - 18 |
| 1.5 Comparison of the agricultural systems in the Sahel and Southern California | 1 - 29 |
| 1.6 Negative impacts of agricultural technology and possible sustainable measures | 1 - 34 |

2 City

| | |
|---|--------|
| 2.1 Urbanization in Hong Kong | 2 - 4 |
| 2.2 Land use pattern in Hong Kong | 2 - 8 |
| 2.3 Land use models and their application to Hong Kong | 2 - 17 |
| 2.4 Changing urban morphology through time | 2 - 20 |
| 2.5 Urban renewal and urban encroachment in Hong Kong | 2 - 31 |
| 2.6 Conflicts between environmental conservation and urban development in Hong Kong | 2 - 37 |

3 Industry

| | |
|---|--------|
| 3.1 Interpretation of a manufacturing system | 3 - 4 |
| 3.2 Interpretation of locational factors | 3 - 4 |
| 3.3 Major locational factors in industry | 3 - 5 |
| 3.4 Operation of locational factors in different industries | 3 - 13 |

| | | |
|-----|---|--------|
| 3.5 | Locational pattern of the iron and steel industry of Mainland China | 3 - 17 |
| 3.6 | Locational pattern of U.S. information and communication technology industry | 3 - 25 |
| 3.7 | Comparison of Mainland China's iron and steel industry, and U.S. ICT industry | 3 - 44 |
| 3.8 | Impacts of industrial relocation and appearance of new production mode | 3 - 45 |

4 Climate

| | | |
|-----|---|--------|
| 4.1 | Heat balance of the Earth | 4 - 6 |
| 4.2 | Global distribution pattern of insolation on the Earth's surface | 4 - 8 |
| 4.3 | Factors affecting the distribution pattern of insolation on the Earth's surface | 4 - 9 |
| 4.4 | Reasons for the latitudinal differences found in the distribution pattern of insolation | 4 - 19 |
| 4.5 | Global distribution pattern of temperature, pressure, wind and precipitation | 4 - 21 |
| 4.6 | Relationship between insolation, temperature, pressure, wind and precipitation | 4 - 43 |
| 4.7 | Climate of low and middle latitude regions | 4 - 46 |
| 4.8 | Impacts of climate on human beings | 4 - 54 |

5 Landforms and Endogenetic Processes

| | | |
|-----|---|--------|
| 5.1 | Structure of the Earth | 5 - 4 |
| 5.2 | Plate tectonics | 5 - 6 |
| 5.3 | Major endogenetic processes and resultant landform features | 5 - 15 |
| 5.4 | Summary of plate tectonic theory | 5 - 32 |

6 Landforms and Exogenetic Processes

| | | |
|-----|--|--------|
| 6.1 | River basin as a system | 6 - 4 |
| 6.2 | Water cycle of a river basin | 6 - 4 |
| 6.3 | Fluvial processes (The work of rivers) | 6 - 7 |
| 6.4 | Major fluvial features along Chang Jiang | 6 - 11 |
| 6.5 | Summary of the characteristics of the three courses of a river | 6 - 23 |
| 6.6 | Impacts of Chang Jiang on human activities | 6 - 24 |
